CALIFORNIA DEPARTMENT OF CONSUMER AFFAIRS
ANNUAL REPORT STATISTICAL APPENDIX 2003-04

The Department of Consumer Affairs (DCA) is one of the primary consumer protection resources for Californians. We provide information to help consumers understand how they can protect themselves from scams and fraud, and what steps they can take if they find themselves victims of such crimes. DCA also protects professionals from unfair and unethical business practices.

DCA's regulatory boards and bureaus license, register, certify, permit or approve individuals or businesses according to qualifications established by legislation and regulations. Some programs authorize other organizations to provide services associated with the entity's purpose such as education of licensees or direct services to consumers. DCA's regulatory entities also investigate complaints and discipline those who violate practice requirements.

The Annual Report helps to monitor DCA's accomplishments by providing numerical summaries for each regulatory entity's licensing, examination, and enforcement processes. This enables individual regulatory programs and DCA to track year-to-year changes within the programs as well as differences between programs. The resulting data inform program and administrative decisions.

The Annual Report provides a descriptive overview of all licensing and enforcement action statistics as well as data showing costs and recovery to consumers and boards stemming from various investigations.

INTERPRETING STATISTICAL INFORMATION:

- Reporting practices among boards and bureaus are not exactly the same because of different legislative mandates for each regulatory program. Because of this difference, not all categories of data apply to all programs. When a particular survey question does not apply to a given program, there is no data to report, so the response is designated as "n/a" for "not applicable."
- Other data may not be reported because a program does not have the capability to track the information or because of electronic system deficiencies, so the response is designated as "NDA" for "no data available." In some instances, a program will have the total number for a given category without having specific numbers broken down into sub-categories.
- Because of the nature of the database, numbers for data under "Complaints" and "Investigations" may have been collected in different fiscal years. As a result, these types of categories often cannot be combined for summary data.
- The term "License Status" is used generically to encompass all of the license statuses used by DCA. These "License Status" categories encompass "Licenses and Registrations," "Certificates and Permits," and "Approvals."

- a) In April 2004 the Board converted its CPA Exam from a paper and pencil exam to a computer-based exam. Therefore, FY 2003/04 CPA Exam data is composed of one November 2003 paper and pencil exam and then the first computer-based testing (CBT) window during April and May 2004.
- b) The CPA Exam consists of four parts and under computerized testing, the candidate must pass all four sections within an 18-month period to pass the exam. This number/percentage reflects the candidates who successfully passed the CPA Exam during FY 2003-04. The "Failed" column indicates all tests not completed.
- c) In FY 2003/04 the average per part passage rate for the November 2003 paper and pencil exam was 36%, and 48% for the computerized exam during April - May 2004.
- d) Total numbers of exams does not represent the total number of candidates

- a) BAR complaints do not necessarily initiate a formal investigation. If a pattern of violations of the Automotive Repair Act is revealed or allegations of fraud are involved, complaints may be used to support the opening of a formal investigation. BAR primarily uses complaint trends and allegations, smog emission analyzer test data, and follow-up inspections to determine the need for formal investigation.
- b) Investigations closed may be referred to the Attorney General, the District Attorney, or Civil Attorney (represents the number of cases, not measured by license). Investigations with lesser violations may be referred for office conferences and/or citations.

- a) The Board for Professional Engineers and Land Surveyors does not distinguish between "complaints" and "investigations"; the two terms are synonymous and interchangeable. All "complaints" are investigated by Board staff. Some complaints are referred to the Division of Investigation (DOI) to assist with the investigation; however, they are then returned to Board staff for further action.

a) Increase in the number of Accusations/Petitions to Revoke Probation filed is due to the additional funding for Attorney General.

b) The Board for Professional Engineers and Land Surveyors does not track closed complaints/investigations by the type of violation initially alleged. They track closed complaints/investigations by the reason for the closure (such as no violation, compliance, referred to the Attorney General, etc.).

a) Total Citations Issued with a Fine is greater than Total Citations Issued due to the fact that a citation can be issued for more than one violation.

b) Fines are issued at boxing events. No citations are issued.

c) Citations cannot be "withdrawn" they can only be "dismissed." A fine is not considered "assessed" until the citation is final; a citation is not final until the appeal process is finished. Once a citation is final, the amount of the fine cannot be reduced. The amount of the fine can only be reduced during the appeal process, and we do not track this information.

d) \$62,700 amount reduced due to citation withdrawn, \$6,133,200 amount reduced due to citation modified
